

Release 1:

1. Bootstrap forms

I created the forms for the website using the bootstrap template, one of the forms that I worked on was creating the Login form that can be seen below. Having a templet of the forms helped the other members to create the coding to make the login page functional.

The screenshot shows the login page of a website called "On The SPOT". The page has a dark blue header with navigation links: Home, My Account, and My Orders. There are also links for Login and Sign Up. The main content area features a large circular profile picture placeholder, the text "LOG IN", and a login form with fields for email (manager@onthespot.com.au) and password (masked with asterisks). Below the password field is a "Remember me" checkbox and a "Login" button. At the bottom of the form, there are links for "Create an account?" and "Forgotten Password?". The footer is dark blue with the text "Contact Us" and icons for Office Hours, Phone, and Email.

2. Html:

The html pages that i created were:

Create account

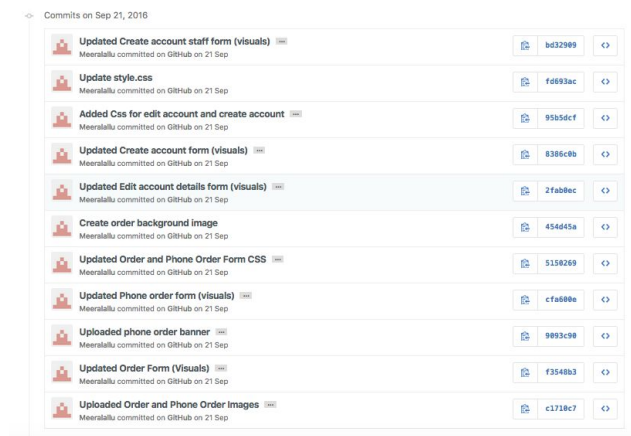

Create staff account

Create order form

Create phone order form

Edit account details

These were created with Atom and then uploaded to Github.

The screenshot shows a GitHub commit history page for September 21, 2016. The page lists 11 commits by user Meeralallu, each with a commit message, a commit hash, and a link to the commit details. The commits are as follows:

Commit Message	Commit Hash
Updated Create account staff form (visuals)	bd32909
Update style.css	fd933ac
Added Cas for edit account and create account	95b5dcf
Updated Create account form (visuals)	8386c9b
Updated Edit account details form (visuals)	2fab8ec
Create order background image	454d45a
Updated Order and Phone Order Form CSS	5159269
Updated Phone order form (visuals)	cfa80e
Uploaded phone order banner	9093c98
Updated Order Form (Visuals)	f354bb3
Uploaded Order and Phone Order Images	c1718c7

3. Release and Sprint plan:

Analyzes each user story, it was then decided what each user story would be release. I made a document where the story id was listed under the chosen release and sprint. Story points was also recorded which indicated the duration a task would take. After I updated the user stories in Jira.

Release Plan

Release 1

Delivery date: 22 September 2016

Total Story Points: 40

Release One will contain deliverables that set up the primary functionality of the package delivery service. This release focuses on developing the initial databases, and the functions that initially populate the database tables with information. These include Account management, customer ordering, order overview, contact information and the added feature of allowing multiple packages per delivery.

Account Management

The Account Management feature assigns roles and access permissions of staff and customers.

Story ID	Story Title	Story Points
S3	Assign Staff Access Privileges	4
S36	View Existing Accounts	4
S32	Create User Account	4
S10	Edit Account Details	4
S15	Encrypted Passwords	2
Story Point Sub-Total:		18

Customer Ordering

This feature allows customers to place orders either through the web application or over the phone to ensure that On the spot can send a package to it's customer. This feature allows the business to

4. Acceptance criteria (Jira):

I also participated with making the acceptance criteria for all the “wont have” and “could have” user stories. I then used Jira to upload the users stories and the acceptance criteria. Below is an example of user story 2 that I uploaded to Jira. Jira helped the team keep track of all the stories as well as seeing the most important to the least.

The screenshot shows the Jira web interface. At the top, there's a navigation bar with 'JIRA' logo and tabs for 'Dashboards', 'Projects', 'Issues', 'Agile', and a 'Create Issue' button. A 'Quick Search' bar is on the right. Below the navigation bar, the left sidebar contains 'FILTERS' with options like 'New filter', 'Find filters', 'My Open Issues', 'Reported by Me', 'Recently Viewed', 'All Issues', and 'FAVOURITE FILTERS'. The main content area is titled 'All Issues' and shows a list of issues. The selected issue is 'AALII-21' with the title '#2 Statistic Display: Statistical Overview'. The issue details are shown on the right, including 'Type: Story', 'Status: CLOSED (View Workflow)', 'Priority: Won't Have', 'Resolution: Fixed', 'Labels: None', and 'Story Points: 8'. The 'Description' field contains the text: 'As a owner I can view the information / data that has been recorded: Amount of customers, Amount of staff, Amount of income the business is making'. The 'People' section shows 'Assignee: Unassigned' and 'Reporter: Meera Lallu'. The 'Dates' section is empty.

Peer review 1:

For the peer review I took some notes when team 51 was presenting the meditation website. From these notes it was easier for the team to write the peer review as the notes guided them.

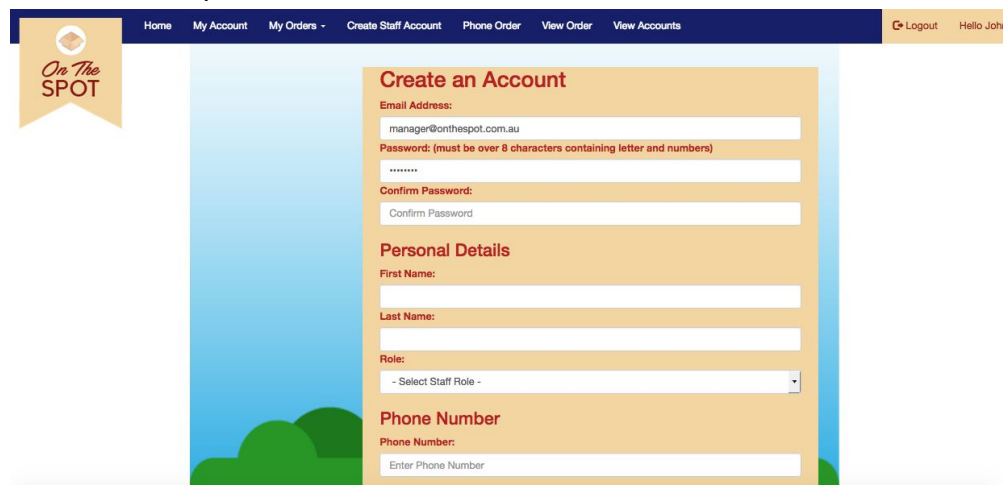

Release 2:

Peer review 2:

Again I took some notes down while team 52 presented there meditation website. From here as a team we wrote up the second peer review.

Css:

I also created the Css for these pages and the other pages for release 2. The Css was created in Atom and then I edited and replaced the current Css on Github. With the new css the website was more appealing as the client asked for a better design. Below is an example of the design that the css helped me to create.

The screenshot shows a web form titled "Create an Account" for a website called "On The SPOT". The form is set against a background of a blue sky and green hills. The form is divided into several sections: "Email Address" with a text input field containing "manager@onthespot.com.au"; "Password" with a text input field containing "*****" and a note "(must be over 8 characters containing letter and numbers)"; "Confirm Password" with a text input field containing "Confirm Password"; "Personal Details" with "First Name" and "Last Name" text input fields, and a "Role" dropdown menu currently showing "- Select Staff Role -"; and "Phone Number" with a text input field containing "Enter Phone Number". The top of the page features a dark blue navigation bar with links: "Home", "My Account", "My Orders -", "Create Staff Account", "Phone Order", "View Order", and "View Accounts". On the right of the navigation bar are "Logout" and "Hello John!". The "On The SPOT" logo is in the top left corner.
